

**CAPITAL**  
**SOLAR GROUP**

Professional. Experienced. **Local.**

*Delivering renewable energy solutions with integrity and relentless focus on customer satisfaction.*

## Our Approach

Beginning with a deep understanding of the social, environmental, and financial performance of your company, we provide customized solutions that enable you to generate clean, economical energy that requires little to no maintenance.

## Client Focused

Capital Solar Group's proactive approach in an evolving industry provides our customers with tailored solutions to fit specific project objectives. We approach each project as if it is our own, with a focus on creating long-term measurable value.

## Turnkey Projects

Capital Solar Group is a licensed commercial solar development, engineering, procurement, construction, commissioning and maintenance firm serving the mid-atlantic region.

## About Us

With over 25 years of solar industry experience, our team delivers customized solutions to meet all of our clients' needs. Our approach to the deployment of premium solar assets originates with strong client relationships so we can fully understand and execute project goals and objectives. We provide engineering, construction, and asset management services for organizations across the Mid-Atlantic region seeking to host systems ranging in size from 10 Kilowatts to 2.5 Megawatts. The solar industry is evolving at a rapid pace, and our in-house NABCEP Certified design team has the understanding of new technologies and code requirements to design the most efficient and cost-effective systems to power your clean energy future.
